Yordy Cobas

Warranty Manager | Process Improvement & Aftersales Operations
Miami, FL · (786) 499-5443 · yordycobas22@gmail.com · linkedin.com/in/yordycobas/

PROFESSIONAL SUMMARY

Warranty Manager and process-improvement specialist who runs a one-person warranty operation for a heavy-equipment distributor. Own the full warranty lifecycle — claims validation, approvals and denials, RMA returns, factory service campaigns, and dealer enablement — coordinating dealer networks across the Americas with factory teams in Malaysia and the Netherlands. Known for turning slow, email-driven processes into documented, measurable workflows — one redesign cut routine-claim resolution from over a week to two hours.

PROFESSIONAL EXPERIENCE

Terberg Taylor Americas — Miami, FL April 2023 – Present
Warranty Manager (promoted from Product Support Analyst)

- Full-lifecycle ownership — Run the warranty operation solo: claims validation, approvals and denials, RMA returns, service campaigns, and dealer enablement — 2,000+ warranty tickets processed across 25+ dealers in the Americas (incl. Canada) and 3 Terberg factories (Netherlands, Malaysia, USA). Quantified a 617-claim backlog (~140 new claims/month) and presented a $12K–$24K overtime recovery plan with month-by-month timelines.
- Cost validation & savings — Reviewed over $2.1M in submitted claims across three factory entities (U.S., Netherlands, Malaysia); saved or rejected over $700K in unsupported costs by applying company policy and procedure; claims processing also generated $50K+ in positive margin.
- **Headcount business case & hiring —** Authored the data-backed justification for departmental expansion — 617 open claims, $863K+ warranty exposure, ~140 new claims/month, single-point-of-failure risk analysis — resulting in an approved Warranty Specialist role. Hiring manager for the role: authored the job post, running screening and interviews; will train and supervise the hire as my first direct report once started.
- **Department transformation —** Rebuilt the warranty operation from manual email/spreadsheet processing into an AI-assisted, semi-automated workflow (Warranty Hub, AI agent, dealer self-service portal) — a one-person department carrying a workload the company plans to staff with two hires.
- **Warranty Hub build —** Designed and built the TTA Warranty Hub in ~1 week using Microsoft Copilot's AI app builder — automated financial calculations, claim management, full audit trail of every change, user and dealer rate management, and KPI, workload, and finance dashboards — replacing fragmented spreadsheets.
- **AI warranty agent —** Built a dedicated Copilot AI agent trained on TTA's warranty terms, conditions, and policy — an on-demand warranty expert answering complex coverage questions correctly ~90% of the time, cutting complex-claim review time by ~80% and deflecting routine internal questions that used to take 2–5 minutes each.
- Warranty portal rollout & automation — Led post-launch rollout of the new warranty portal (Halifax) across the N/S Americas dealer network, delivering an estimated 15–20% efficiency gain through workflow automation: copy-claim functionality, auto-populated claim fields, and automated approval-to-payment finance handoff. Designed the Jira↔Halifax API integration workflow and a 696-claim dealer approval-rate matrix for auto-approval thresholds; key contributor to the platform's global redesign.
- **Process redesign — pre-authorization SLA —** Diagnosed the email-based factory pre-authorization bottleneck and proposed delegated approval authority for recurring claims (≤$1,500), a 24-hour factory response SLA, and tiered 24/48/72-hour escalation — cutting routine-claim resolution from over a week to as little as two hours, documented across five cases.
- **Campaign-claim collaboration —** Partnered with a dealer to unblock 100+ campaign claims (CAM0185/CAM0186) stalled by manual entry of 10–18 parts per claim: negotiated flat-rate approvals in Jira with a single consolidated credit note per campaign — faster submissions, faster close, zero duplicate entries.
- DOT & EPA compliance project — Initiated and led a 14-month DOT-vehicle / Cummins EPA compliance project (February 2025–April 2026) coordinating TTA teams, Terberg Benschop engineering, the dealer

network, and Cummins — VIN validation, regulatory clarification, EPA sticker procurement/application, and final registration. Achieved full compliance, mitigating DOT/EPA risk.

- **Board-recognized initiatives —** Presented to the board of directors twice at annual board meetings; recognized in the 2025 board review for a same-day TTAM campaign execution and unifying the rental & leasing pre-approval process across product support and warranty systems. Run factory service campaigns end-to-end as factory–dealer liaison, negotiating deadline extensions and driving dealer compliance.
- **Rejection-rate analytics —** Ran rejection-rate analytics across the dealer network (dealer rates ranging 31–73%), isolating the drivers — excessive labor time, inflated parts pricing, missing documentation — benchmarking best practice at 97% approval and driving SRT and documentation standardization, plus a claim-narrative framework taught to dealers.
- **Safety campaigns —** Partnered with Legal Counsel and the Netherlands factory to establish standing warranty policy for safety-related campaigns in the USA: safety claims stay supported regardless of warranty status or end dates. Drove CAM0175 to 33/33 completion with weekly board reporting, and stood up an emergency safety campaign in under 24 hours that reached 100% completion across the dealer network.
- **Cross-functional training & direction —** Trained a Product Support resource on warranty claim processing and directed his daily warranty workload during a split-role assignment (support priority, warranty overflow); coordinate credit-note processing with Accounting.
- **Credit-note payment redesign —** Eliminated the dealer-invoice waiting game — claims sat open for weeks awaiting dealer invoices — by issuing credit notes directly at claim approval, closing claims within an hour of the approval notice.
- **Finance operations —** Processed 1,000+ credit notes and 800+ invoices; the go-to for accounting issues in D365 — settling transactions and making corrections.
- Dealer enablement — Onboard and train dealers across the Americas on POL Parts OnLine, Jira ticketing, and Terberg Connect telematics — step-by-step guides and demo videos that make dealer teams self-sufficient; present warranty training to dealer leadership (GMs, VPs, regional/warranty/service managers). Authored the 87-page TTA Warranty Manual (2026) — existing policy as a clear step-by-step dealer reference.

TTEC — Remote August 2022 – March 2023

BofA Fraud Analyst (Contract) · Health Insurance Agent (Contract)

- **Fraud analysis —** Performed judgmental reviews of high-risk BofA transactions: approving legitimate activity, restricting compromised accounts, and guiding clients through fraud and security events.
- **Health insurance enrollment —** Helped members through open enrollment following HIPAA guidelines and company procedures; determined special-enrollment eligibility and processed applications, payments, corrections, and cancellations.

Headquarter Toyota — Hialeah, FL July 2018 – May 2019

Service Advisor / Assistant Manager

- **Warranty & service experience —** Advised customers on warranty protections, cost-saving options, and trade-in advantages; collaborated with the insurance department on claims and settlements; managed service-department follow-ups and vehicle status updates.

EDUCATION & CERTIFICATIONS

Education: Universal Technical Institute (UTI), Orlando, FL — Automotive Technology & BMW FastTrack Training Program (January 2016 – April 2017) · American Senior High School, Hialeah, FL — High School Diploma (Honors, GPA 3.6; May 2015)

Certifications: Codecademy — Data Scientist Analytics Specialist Certificate (January 2023) · Google — IT Support Professional Certificate (December 2022) · BMW — Automotive Technician (March 2017)

CORE COMPETENCIES & SYSTEMS

Competencies: Warranty Process Redesign · SOP & Workflow Design · SLA & Escalation Frameworks · Claim Validation & Cost Avoidance · Field Campaign Management · Dealer Enablement & Training · Warranty Cost Analytics · Applied AI: ChatGPT, Claude, Microsoft Copilot · Prompt Engineering · AI Workflow Automation

Systems: Microsoft Dynamics 365 · Jira · Microsoft 365 (Excel, Word, PowerPoint, Outlook, Teams) · Microsoft Copilot · Halifax (warranty portal) · POL Parts OnLine · Terberg Connect | Languages: English · Spanish
